Engineered Ceiling Solutions

SOFFIT

ABOUT ARKCEIL

ArkCeil delivers premium polymer-based soffit and ceiling systems engineered for architects, contractors, and designers who refuse to compromise.

Our panels replicate authentic wood grain using advanced heat-transfer technology offering the aesthetic appeal clients want with zero maintenance callbacks. From residential projects to commercial installations, ArkCeil provides a complete system: panels and accessories designed for fast, clean installation and long-term performance.

What sets us apart

Complete Integration – Panels and trims engineered as one system

Installation Speed – No plywood required, reducing labor and site mess

Universal Accessory System – One trim height across all categories supporting manageable stock and versatile combinations.

10-Year Warranty – Specify with confidence

Created For Spaces
That Deserve a Refined Finish.

ARKCEIL

SOFFIT

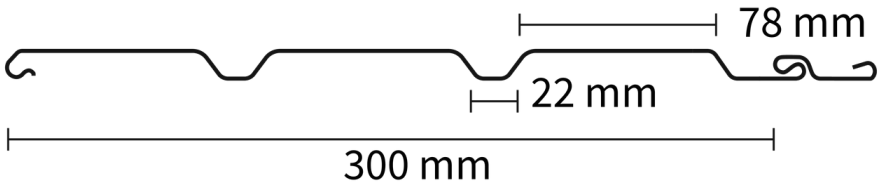

3 BARS | 2 GROOVES

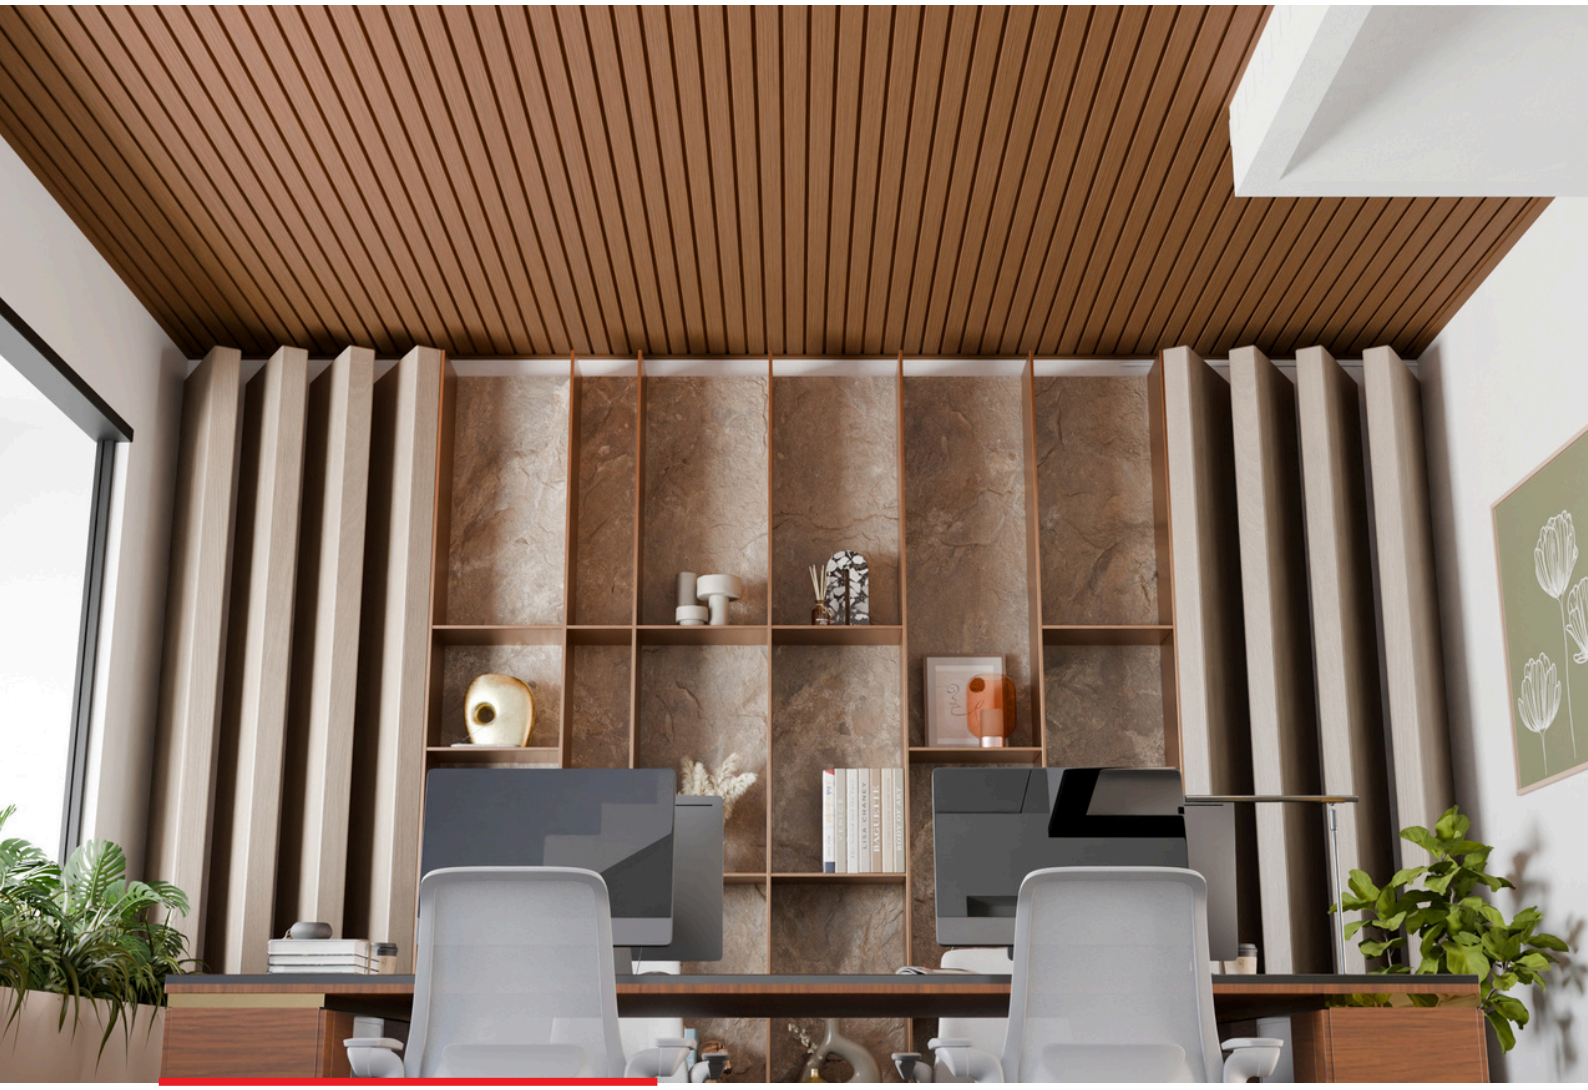

ArkCeil Soffit features a three-part architectural profile with two integrated grooves that create subtle shadow lines. The balanced design delivers a clean and modern ceiling appearance while maintaining visual depth. Suitable for residential and commercial soffit and ceiling applications.

Best suited for standard ceiling and soffit zones where a clean, minimal appearance is required. Ideal for balconies, passages, verandas, entrance canopies, and covered walkways. Works well in areas needing subtle detailing without visual heaviness.

ARKCEIL

MINI SOFFIT

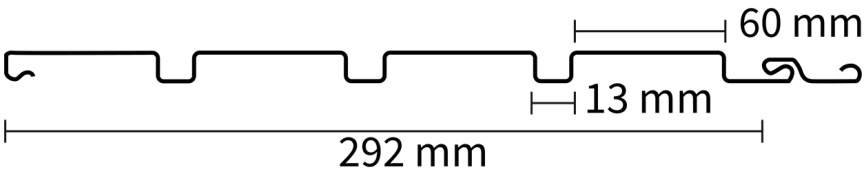

4 BARS | 3 GROOVES

Mini Soffit offers a compact yet detailed profile with four architectural parts and three grooves. The added articulation enhances depth and shadow definition, making it ideal for low-height soffits and feature ceiling areas.

Recommended for low-height ceilings and compact soffit areas where additional detailing is desired. Suitable for residential balconies, porch ceilings, lift lobbies, corridors, and feature ceiling bands.

ARKCEIL

LOUVER

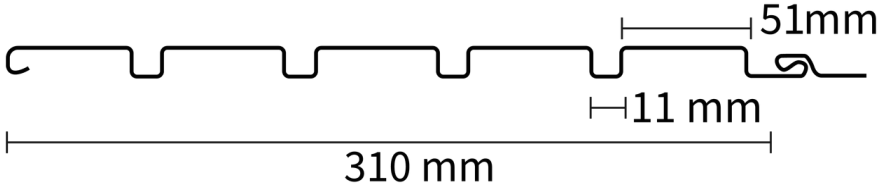

5 BARS | 4 GROOVES

Engineered with a five-part profile and four grooves to create a strong linear expression for ceilings and walls. The layered design produces bold shadow lines, enhancing architectural depth and visual rhythm across surfaces.

Best suited for spaces that emphasize form and structure, ArkCeil Louver are ideal for semi-covered façades, parking ceilings, staircases, canopies, and transition areas.

ARKCEIL

MINI LOUVER

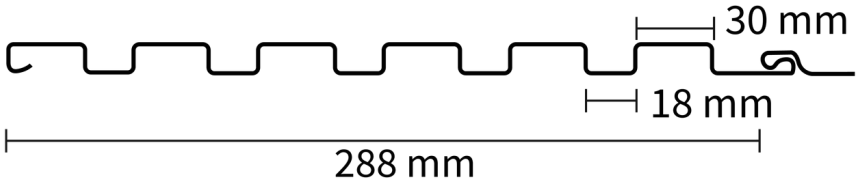

6 BARS | 5 GROOVES

Mini Louver feature a refined six-part profile with five grooves, delivering maximum architectural detail in a compact format. The precision-engineered design creates depth and texture, making it ideal for feature-driven applications where fine detailing is essential.

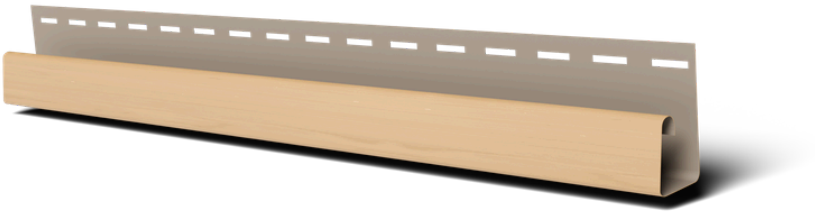

Designed for detail-focused zones, Mini Louver are suitable for decorative ceiling panels, architectural highlights, partition screens, and design accents across residential and commercial interiors.

SHADES

Our nine premium wood-grain finishes capture the authentic beauty of natural timber, engineered for architectural precision and lasting performance. Each shade replicates genuine wood characteristics through advanced heat-transfer technology, delivering realistic grain patterns and surface textures that maintain their appearance across years of exposure.

From the warm elegance of Golden Oak and rich depth of Walnut to the contemporary neutrality of Ashwood Grey and crisp clarity of White, these finishes offer architects and designers versatile options for residential, commercial, and hospitality projects. Oak Wood Ocre, Mahogany, Royal Nut, Birch, and Golden Maple complete a sophisticated palette that harmonizes with diverse interior styles while ensuring seamless coordination across soffit, baffle, and accessory systems.
